

Strange noise from the electrical panel at home

Preview

A soft hum from the electrical panel is often normal, but loud buzzing or crackling signals danger and needs immediate attention. Loose wires or connections can cause arcing, generating heat and increasing fire risk behind walls or inside the panel. When it starts making noise--especially unfamiliar buzzing, humming, or clicking--it's trying to tell you something. That low, persistent hum or irregular crackle isn't just background noise. This guide will cover everything you need to know about the noises your electrical panel might be making. In fact, according to the National Fire Protection Association, fire. An electrical panel, also known as a breaker box or load center, is the main distribution point for electricity in your home.
