

Article Overview

T-shaped cable trays typically range from EUR20 to EUR100 per piece depending on size, material, and supplier, with bulk orders often offering discounts.

Overview of T-Shaped Cable Trays

A T-shaped cable tray (or T-piece) is used to create junctions in cable routing systems, allowing three cable trays to connect securely and maintain organized cable management . These trays are commonly made from galvanized steel, stainless steel, or PVC, offering durability, corrosion resistance, and compliance with fire safety standards such as DIN 4102-12 and CE certification . They are widely used in industrial facilities, office buildings, data centers, and vehicle electrical systems.

Price Factors

The cost of a T-shaped cable tray depends on several factors:

- o Material: Galvanized steel and stainless steel are more expensive than PVC or plastic options due to higher durability and mechanical strength .
- o Dimensions: Standard sizes, such as 300 x 60 mm, are commonly available, but larger or custom sizes may increase the price .
- o Supplier and Quantity: Wholesale suppliers like Alibaba offer bulk pricing, which can significantly reduce the per-unit cost for large projects .
- o Additional Features: Ventilated trays, fire-resistant coatings, or pre-drilled holes for easier installation may also affect pricing.

Typical Price Range

- o Small to medium T-pieces (PVC or standard galvanized steel): approximately EUR20-EUR50 per piece .
- o Larger or heavy-duty T-pieces (stainless steel or high-capacity trays): approximately EUR60-EUR100 per piece .
- o Bulk orders: Suppliers often provide discounts for orders over EUR500-EUR1000, which is common for industrial or construction projects .

Where to Buy

- o Ekabel24: Offers high-quality T-piece connectors with CE certification and fire resistance, suitable for industrial and commercial installations .
- o Alibaba: Provides a wide range of T-type cable trays for wholesale, including customizable options for

T-type cable tray price

offices, factories, and labs .

o RS Online (UK): Stocks various cable tray types, including ladder, wire mesh, and T-pieces, with fast delivery and technical support .

Installation Notes

T-shaped cable trays are designed for easy installation, often requiring only a few screws per side to secure the trays together . They are ideal for creating horizontal branches in cable management systems and can be combined with straight sections, mesh baskets, and vertical ladders for complete routing solutions. By considering material, size, and supplier, you can select a T-shaped cable tray that balances cost, durability, and compliance for your specific project needs.
