Tesla's AI Day brought new details about its AI-powered machine learning server, Dojo. Elon Musk opened Tesla's AI Day with a call for AI researchers to join the company and help them build up Tesla's advanced computer vision and self-driving technology. We develop and deploy autonomy at scale in vehicles, robots and more. 0 Deed) Eager to continue delving into the world of supercomputing, Elon Musk is pressing forward with his newly renamed "Cortex" AI supercluster. The AI training complex is designed to advance Tesla's efforts in autonomous driving, predictive maintenance, and other innovative applications. ? Cortex features approximately 100,000 Nvidia H100/H200 GPUs for AI training.

Real-time problems and outages for Telsa. Is the site down? Log-in not working? Here you see what is going on.

Tesla CEO Elon Musk said on X the Tesla AI robotaxi launch began in Austin on Sunday afternoon with customers paying a

Used NVIDIA V100 server GPU becomes low-cost local LLM accelerator Hardware Haven has tested one of the stranger GPU setups we have seen recently. The

91 Angebote zu Nvidia Tesla V100 32GB im Grafikkarten Preisvergleich. Bei idealo.de günstige Preise für Nvidia Tesla V100 32GB vergleichen.

The videos released show a vast network of servers, sophisticated cooling systems, and cutting-edge infrastructure tailored for optimal AI

He took an Nvidia V100 server GPU with an SMX interface, which is similar to using a socketed processor, and converted it to a standard PCIe bus, which plugged into a consumer

Tesla's June 22 robotaxi pilot appeared to go without major problems as the service's first invite-only customers shared upbeat reviews. A critic said he

Musk's video of the Cortex supercluster shows off the in-progress assembly of a staggering number of server racks.

The acquisition comes after Tesla said new spending will go toward AI-related initiatives involving its robotaxi service and its Optimus humanoid.

Teslaai Server

Elon Musk shared the progress of Tesla's supercluster, Cortex AI, in Austin, Texas. The project will ship with 50,000 NVIDIA H100s and an additional 20,000 of the company's custom Dojo AI...

Notes GPU support may also depend on the hypervisor software that you are using. See the product support matrix for your vGPU software release for details: vGPU Software release family

Eager to continue delving into the world of supercomputing, Elon Musk is pressing forward with his newly renamed "Cortex" AI supercluster. The

If your stack is bare-metal Linux, llama.cpp or Ollama, and a real server chassis providing the airflow these cards were designed around, the friction is mostly a one-time thing.

In autonomous and self-driving vehicle news are Tesla, Pony.ai, Moia, Uber, VW and Robo.ai. Tesla Receives First European FSD Supervised Approval In Netherlands The Dutch vehicle

Designed to process exabytes of raw video data from Tesla's global fleet, Dojo promises to accelerate Full Self-Driving (FSD) model training by

Plus: A Molson-Coors hack, Github controversy, and more of the week's top security news.
