An uncoiler machine, also called a coil uncoiler or decoiler, holds a metal coil and unwinds strip or sheet material into downstream equipment such as a straightener, feeder, stamping press, roll forming machine, shearing machine, laser cutting line, or cut-to-length system. For coil-fed. Pair the right adjustable core decoiler with well-matched wire uncoilers and rewinders, and you can claw back a meaningful chunk of lost time, sometimes as much as 30 percent. Most plants don't lose minutes to one big problem. They are an integral part of many manufacturing industries, including automotive, HVAC, and electrical. Decoilers are typically equipped with motor-driven reels that. Techna is a supplier of one of Europe's most extensive range of cable handling equipment, such as, Shaft Take-Ups, Pintle Take-Ups, Shaft Payoffs, Pintle Payoffs, Coilers & De-Coilers, Automated Cable Handling Systems, Cable Installation Equipment and Cable Storage Racking. The scope of performance of the winding machines can be individually configured with our modular system.
