

What router should I use for a 100 Mbps fiber optic connection from China Mobile

Preview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Searching for the ideal WiFi router to match your 100 Mbps internet speed? You're in the right place! In this guide, we'll explore the top routers tailored to deliver optimal performance for your 100 Mbps connection. With the many options available on the market, picking the best router for fiber internet can be tricky. I worked with the Cybernews research team to review and compare different routers and give. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space.
