The Fulleto XL-21 series is an indoor, floor-standing power distribution cabinet engineered for excellence. It is suitable for power control of power plants, substations, industrial and mining enterprises and various terminal power distribution fields, such as soft start control, power automatic. Standard Type (P Type): This version has a cabinet height of 1700mm or 1800mm and is designed for independent installation. It can be equipped with entry and exit holes at the top as required. The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options for users to choose, it is an. XL-21 Low Voltage Distribution Cabinet is designed for industrial power distribution and suitable for indoor use in power plants, factories, and mining enterprises. Prefabricated customized boxes are used, which are divided into low-voltage warehouse, medium-voltage warehouse, machine warehouse and spare parts warehouse according to different functions, including all power distribution.

Summary The basic frame of the XL-21 power distribution box is a C-shaped assembled structure, which is processed by galvanizing or spray-coated, and the necessary components are assembled into a

XL-21 power distribution box is divided into two types. The box height of 1700mm and 1800mm is ordinary type (P type).

XL Low Voltage Power Distribution Cabinet The XL-21 low voltage power distribution cabinet is suitable for three-phase four-wire systems with AC voltages up to 500V. It is primarily used for power

The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options for users to choose, it is an ideal

The Fulleto XL-21 series is an indoor, floor-standing power distribution cabinet engineered for excellence. It serves as the central hub for receiving and

XL-21 power distribution cabinet Cabinet front door installed ammeter, voltmeter and the signal lamp, button, selector switch and other components. The main

The XL-21 power distribution cabinet adopts new electrical components, which have the characteristics of compact structure, convenient

The XL-21 type low-voltage power distribution box has a sturdy structure and good protection performance. It is easy to install and wire, and is suitable for power distribution in factories,

XL type power distribution box model

The XL-21 Power Distribution Box is used for power distribution, conversion, transmission, control, and on-site operations in low-voltage distribution systems.

XL-21 power cabinet provides reliable indoor power distribution for industrial and plant applications, featuring compact design, easy maintenance, and flexible

Overview The box power distribution is applicable to the industrial and civil architectures as the dynamical and light distribution in 3-phase 4-wires power

Reliable XL-21 AC low-voltage distribution boxes for industrial and infrastructure use. Certified manufacturer offering OEM service and global delivery.

The XL-21 Low-Voltage Power Distribution Cabinet is suitable for power distribution in power plants and industrial and mining enterprises. It is used as a power distribution system for three-phase, three

The XL-21 Low Voltage Power Distribution Cabinet serves various industries, including metallurgy, mining, petroleum, chemicals, textiles, ports, and stations. It functions as a power distribution and

XL-21 power distribution box is suitable for power distribution in power plants and industrial and mining enterprises, in three-phase four-wire or three-phase five-wire systems with AC voltage of 500 volts

XL Low Voltage Power Distribution Cabinet suitable for three-phase four-wire systems with AC voltages up to 500V. It is primarily used for power distribution purposes in power plants, indu
